MICELLANEOUS PROPS
Realistic & Relevant Training – Oak Harbor, WA 98277

Feb.
2005

MICELLANEOUS PROP IDEAS:

This Prop Shop includes a number prop ideas that can be incorporated into existing props or used individually for basic training evolutions including SCBA training, search & rescue mazes and many other basic firefighter skills – the options are truly unlimited.

MATERIALS:

Construction materials needed for these props varies depending upon the instructors needs. Most props can be constructed using 2" x 4" supports covered with ½" CDX plywood. For portability, it's recommended that each prop be assembled with carriage bolts whenever possible (this will allow the prop to be broken down, transported and reassembled much easier).

PROP IDEAS

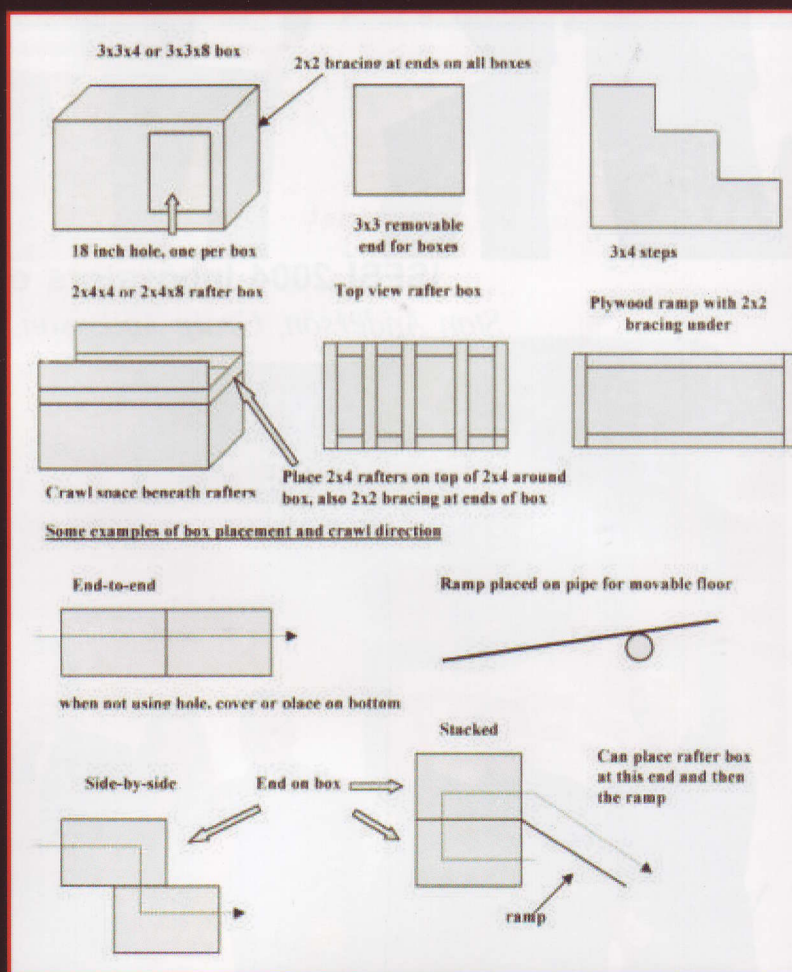

Box Tubes

Stairs

Rafters with Crawl spaces

Ramps

Floor Assemblies

CREDITS:

The description and related details of this Prop Shop have been provided by Dr. Stanley Anderson (stanande@whidbey.net), Lt. Craig Anderson (craig.Anderson@oakharbor.org), and Paul Schroer (paul.schroer@oakharbor.org) of Oak Harbor, Washington.
